LED status indicator lights

Power over Ethernet (PoE) 802.3af compatible

Compatible with most modern IP telephone systems including Cisco, Nortel, and Avaya

Includes network interface and long line extender

IP Talkback Door Intercom

Avtec offers the IP Talkback Door Phone Intercom designed to work with VoIP phone systems.

The vandal-resistant, stainless steel SIP VoIP flush-mount intercom is designed for use with VoIP phone systems. The IP Talkback Door Phone Intercom is compatible with any SIP-based telephone systems via an IP-based network.

MOUNTING

For enhanced protection against static electrical discharge, Avtec recommends the faceplate shipped with the intercom be installed in a grounded electrical box.

The doorplate is designed for double-gang FD electrical box mounting and must be within 350 feet of the network interface.

The network interface is designed for wall mounting and must be within 100 meters of the network switch. Use the provided wood screws and mounting brackets to secure the network interface to the wall.

SPECIFICATIONS

Circuit: SPDT

Electrical Ratings: 20 A 125-250 VAC
1 H.P. 125-250 VAC

Standard Warranty: 1 year
